DETAILED ACTION

Allowable Subject Matter

Claims 35-37 are allowed.

The following is an examiner's statement of reasons for allowance:

1. In regard to claim 35, the prior art does not teach or fairly suggest the use of a stereoscopic imaging system that uses wedge prisms formed of an optical material that has an index of refraction that is voltage controlled, the system also having a reference light source unit which collimates light emitted from a slit and generates a reference light, and using an external control device obtains the image from the image sensing means, determines a position of the reference light and prepares a data table indicating the relation between the voltage applied to the wedge prism and the angle of deviation of the reference light beam passed through the prism, and stores the table in a storing section.
2. In regard to claim 36, the prior art does not teach or fairly suggest the use of a stereoscopic imaging system that uses wedge prisms formed of an optical material that has an index of refraction that is voltage controlled, the system also having a reference chart having two slit marks, and using an external control device obtains the image from the image sensing means, determines a position of the reference chart and prepares a data table indicating the relation between the voltage applied to the wedge prism and the angle of deviation of the reference light beam passed through the prism, and stores the table in a storing section.

3. In regard to claim 37, the prior art does not teach or fairly suggest the use of a stereoscopic imaging system that uses wedge prisms formed of an optical material that has an index of refraction that is voltage controlled, the system also having a reference light source unit which generates a spot light by a laser beam, and using an external control device obtains the image from the image sensing means, determines a position of the reference light and prepares a data table indicating the relation between the voltage applied to the wedge prism and the angle of deviation of the reference light beam passed through the prism, and stores the table in a storing section.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
